

NATIONAL INTERNATIONAL GLOBAL

Global assembly projects from a single provider

NIG-MONTAGEN.DE

Our Work

NIG excels globally as a powerful, medium-sized specialist for the assembly of machinery, facilities and complete production lines as well as industrial relocation and asset moving, which ranges from single machines to entire plants.

Our first rate, highly qualified expertise across all industries is the foundation for a complete service under one roof. For our customers, we oversee everything from planning of disassembly to reassembly, logistics and transportation, recommissioning and beyond — reliably and flexibly.

Family Business

Owner-operated

NIG has been family-operated since the company was founded.

Trust

Management and staff follow mutual development goals.

Mindfulness

Management always keeps the door open for concerns, optimisation suggestions and staff requests.

ABOUT US

Our success stands on three pillars: People, expertise and precision, where the employee comes first as an individual.

MISSION STATEMENT

Managing Directors

Richard Müller

is managing partner of NIG — Neuruppiner Industrieverlagerungs GmbH. Since January 01, 2023, the management is in the hands of Richard Müller, who continues the standards and values of NIG in the second generation as managing partner.

After his training as a mechatronics engineer, Richard Müller completed a degree in business administration, which he successfully completed.

Richard Müller passed through all levels of the company up to authorized signatory, and was prepared for the management of the company in the second generation over many years by the steady and strategic development process of the previous managing partners Volker Tolle and Reiner Müller, who founded and built up NIG together.

Our History

2005

Foundation of NIG

2007

Laying of foundation stone for new company headquarters

Nomination for German Founder Award — NIG becomes training company

2014

Expansion of the company premises in Neuruppin

2018

Promotion of the second generation to the management

2021

Relocation and expansion of the southern branch in Nuremberg

2006

First major international projects

2008

Move to new headquarters & first certification DIN 9001 & SCC

2012

Opening of the South German branch in Bavaria

2016

Integration of an in-house training center for NIG assembly teams

2019

Expansion of the industrial surveying department and new office space

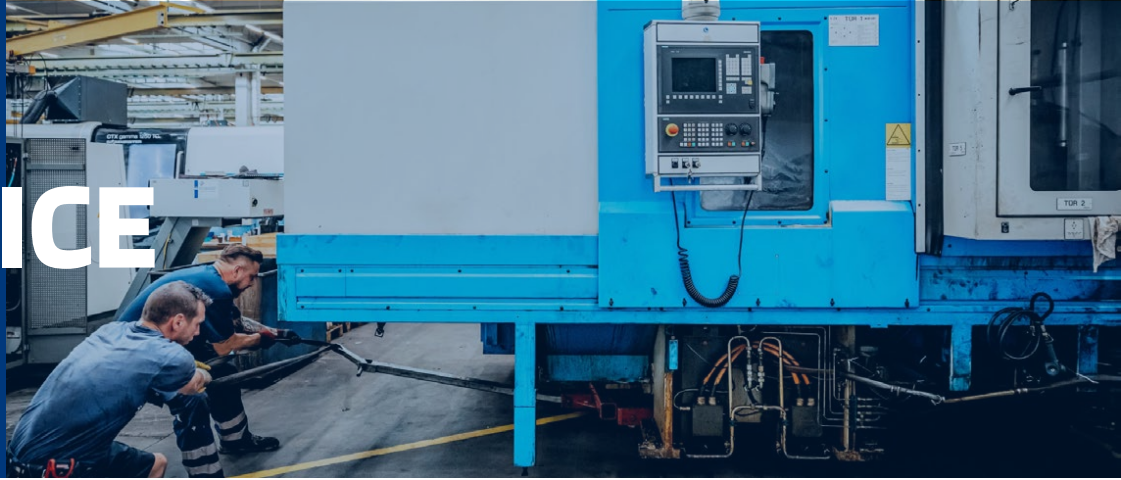

2023

Richard Müller takes over the management from Volker Tolle and his father Reiner

OUR SERVICE

Up to 150 fitters deployed globally

NIG employs highly qualified staff with excellent expertise in various industries.

We send up to 150 fitters and specialists in mechatronics, electrics, pneumatics and transportation to sites around the globe. All of them have years of practice to make informed decisions in concert with the customer to engineer your assembly or relocation project successfully.

Installation

NIG excels in global machine relocations ranging from single components to entire plants, and assembles new machinery and deliveries.

Relocation

As a general contractor, NIG takes on all relocation steps from switch off at the old site to startup-checks at the new production site.

Industrial Surveying

Measuring relocation items with laser technology supports a seamless and cost efficient recommissioning.

Service

For service customers, our teams take care of readiness for use and safety of the machinery at economically viable times and according to schedule.

Personnel Leasing

NIG supports its customers by making highly qualified personnel available for certain peak times in work loads as part of our personnel leasing service.

Industries

NIG's aspiration to offer all possible services from a single provider leads to being a role model for versatility.

Precision of up to 0.05 mm in aviation, all certifications and permits for the automotive industry, expertise and skills in machine and plant engineering, as well as tough hygiene and work regulations and realisation in cosmetics, hygiene and medicine — you find all these under one roof at NIG.

Aviation

Multifaceted industry with precision requirements in the μm -range

Automotive and Suppliers

Partner for several OEM and their suppliers

Cosmetics, Hygiene and Medicine

High standards for staff and equipment and highly sensitive technology

Metal, Paper and Glass

Heavy loads, expertise and technology-centric tasks

Plants, Materials Handling, Automation

NIG as a strategic partner for assembly and relocation

Food and Luxury Foods

Highest standards for composition, cleanliness and quality

RELOCATION

As a general contractor, NIG takes on all logistical, mechanical, electrical and electronic control tasks for the relocation as a single point of contact and delivers these as part of a tailored service package at internal construction sites in Germany and all over the world. For this, NIG relies on experienced staff and a collection of high-end special tools.

We Move:

Machines

Personnel Leasing

INDUSTRIAL SURVEYING

3D Laser scanners, laser trackers, tachymeters are part of the tooling for NIG's measuring experts. They provide maximum accuracy with the precision of a hundredth of a millimeter and clear assembly drawings on the PC, which are highly valuable for customers and assembly staff on site. Contactless measurements allow you to acquire data from a live production system.

We Guarantee:

**Maximum
accuracy**

**Lowest
tolerances**

**Modern measuring
technology**

**Digital proof
of quality**

We Provide:

SERVICE

NIG assists its clients in achieving planning reliability, optimal production conditions, maximum machine usage potentials and maintenance that conserves resources. The service teams use maintenance check lists and preventative repairs of the entire machinery in low production phases to secure continuous readiness for use.

Planned upkeep

Preventative maintenance

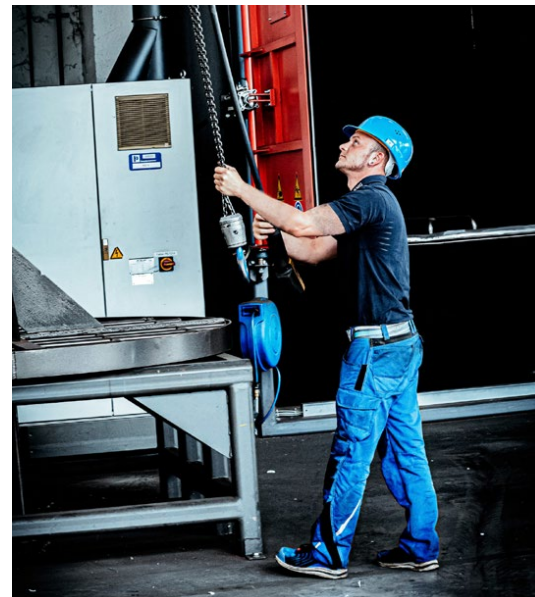

Regular maintenance by check list

Optimised resource usage

PERSONNEL LEASING

The extensive service offerings of NIG for its customers include relief during peak loads by providing its own technical staff. NIG employs highly qualified technicians with broad experience in the areas mechatronics, mechanics, electrics and automation, who are well suited as leased personnel for temporary tasks for our customers.

High education standards

Fast training

Reliability

Extensive Experience

OUR CLIENTS

Certificates

With more than 30 years of experience in assembly and relocation of machinery, equipment and production lines under our belts, we work across all industries and comply with necessary standards.
